Aspiring Software Engineer — Full-Stack Web Development — Backend Systems — API Design

Summary

Full-stack web developer with hands-on experience building real-world applications, RESTful APIs, and automation systems using JavaScript, Node.js, Python, and React. Built production-grade platforms serving real users and contributed to systems improving performance by 20%+. Experienced in SDLC, backend architecture, and third-party API integration. Currently Vice-President of the Computer Science and Innovation Society (CSIS) at MMMUT.

Education

Madan Mohan Malaviya University of Technology (MMMUT), Gorakhpur

Expected May 2027

B.Tech in Computer Science and Engineering

Work Experience

Python Technology Intern

Dec 2025 – Feb 2026

Infosys Springboard (Remote)

- Developed 3+ Python applications for enterprise solutions, improving overall system performance by 20%.
- Applied SDLC principles and Python scripting to deliver clean, maintainable, production-grade code.

Projects

Prayukti V-Lab | *Next.js, Rust (Axum), PostgreSQL, Docker, REST APIs* — [\(link\)](#)

Jan 2026 – Present

- Founded and built a Multi-Tenant fullstack SaaS platform serving 400+ concurrent students across MMMUT, hosting 50+ experiments across 5+ engineering subjects.
- Implemented real-time experiment execution, automated result evaluation, and RESTful APIs, reducing dependency on physical lab infrastructure by 60%+.

Caller AI | *Node.js · PostgreSQL · Webhooks · Next.js* — [\(link\)](#)

Jan 2026 – Present

- Built a backend automation platform with event-driven webhook orchestration, asynchronous job processing, and structured logging; directly applicable to automating lead generation and operational workflows.
- Designed scalable REST APIs enabling seamless integration with third-party services, analogous to CRM and property management system integrations

YouTube Channel Data Analysis System | *Python · Pandas · REST APIs · MySQL* — [\(link\)](#)

Dec 2025 – Feb 2026

- Engineered an ETL pipeline extracting 10,000+ records from YouTube's REST API, transformed with Pandas, and loaded into MySQL.
- Built analytics backend enabling data-driven insights from large-scale channel metadata; automated the data refresh cycle.

Technical Skills

Languages: C, C++, Java, Python, PHP, SQL, JavaScript

Frontend: React, HTML, Tailwind CSS, WebSockets

Backend & APIs: Node.js, REST APIs, Webhooks, Twilio, Python Scripting

Databases: MySQL, MongoDB

Developer Tools: Git, GitHub, VS Code, Agile / SDLC

Coursework: Data Structures & Algorithms, DBMS, OOP, Operating Systems, Computer Networks

Position of Responsibility

Vice-President, Computer Science and Innovation Society (CSIS) — MMMUT

April 2026 – Present

- Led and coordinated technical events, hackathons, and community initiatives at MMMUT, driving student participation and innovation.

Certifications

Python Foundation Certification — [\(link\)](#)

Infosys Springboard

- 14+ course completions: Python, OOP, DBMS, NoSQL, Agile Scrum, Software Engineering

Full-Stack Web Development Certification — [\(link\)](#)

Web Stack Academy

- Frontend, backend, and deployment — React, Node.js, REST APIs, databases
